

July 3, 1958

Dear Herman:

The Pediatrics Department here is interested in adding to its staff a member who would be interested in research along genetic or biochemical lines or both. Nathan Smith, the chairman of the department, brought up the name of Neil Kirkman, who has been working with you, and I would very much appreciate your evaluation of his capabilities both as a laboratory and as a clinical investigator.

Ioo rushed to add much else just now; you must be in the same boat.

Yours,
